Summary

Senior full stack developer with solid experience in **C#/.NET, Java and TypeScript**, building and evolving **secure, performant and scalable RESTful APIs**. Worked in **B2B telecom at Allcom Telecom** (the largest IoT operator in Latin America), serving large corporate clients, where I **led a team and architected solutions**. Strong in **SQL Server** and relational databases, **microservices and messaging (RabbitMQ)**, **CI/CD and Docker**, with consistent practice of **Clean Code, SOLID and TDD** in agile (Scrum/Kanban) and cross-functional teams (QA, DevOps, Product).

Education

- **Universidade Presbiteriana Mackenzie** São Paulo, Brazil
Bachelor of Information Systems; In Progress 2023 – 2027
- **ETEC Basílios de Godoy** São Paulo, Brazil
Technical Diploma in Systems Development; Graduated 2021 – 2022

Experience

- **Painel TAP** São Paulo, Brazil
Senior Full Stack Developer Mar 2025 – Present
 - **Full-Stack Web Development:** Full-stack development of a SaaS platform with Python and Node, exposing RESTful APIs, internal interfaces and *data-driven* dashboards. Automation, web scraping and integrations with AI/LLM models, focused on architecture, performance and scalability.
 - **Microservices, Messaging and CI/CD:** Microservices architecture with messaging (Go), CI/CD pipelines on AWS and GitHub, and quality assurance with TDD and integration tests.
- **Allcom Telecom** São Paulo, Brazil
Mid-level Full Stack Developer Jun 2024 – Mar 2025
 - **Large-Scale IoT Platform (4M+ devices, 8,000+ clients):** Worked on products of the largest IoT operator in Latin America, with B2B clients and strategic partners such as **Claro, Vivo, Qualcomm and Nokia**. Full-stack web development with C#/.NET, Next.js, Node, React, Laravel, Python, Docker and **SQL Server**. Secure and scalable RESTful APIs, microservices and messaging (RabbitMQ), automation and internal interfaces for payment methods (POS), smart cities, utilities, telemetry and fleet segments.
 - **Technical Coordination and Architecture:** Led a team and architected solutions alongside cross-functional teams, defining technical standards and ensuring quality with Clean Code, SOLID and testing.
- **Origin9** São Paulo, Brazil
Mid-level Full Stack Developer Dec 2023 – Jun 2024
 - **Full-Stack Web Development:** Front and back-end web development with C#/.NET, Angular, Node, Python, React and Docker. RESTful APIs, automation, web scraping and relational databases under agile methodologies.
- **YOUDevelop** São Paulo, Brazil
Mid-level Full Stack Developer Oct 2021 – Dec 2023
 - **Full-Stack Web Development:** Front and back-end web development with C#/.NET, Angular, Next, React, Firebase and Supabase. Building RESTful APIs, data integrations and continuous delivery in agile methodologies.
- **Morph** São Paulo, Brazil
Full Stack Web & Mobile Engineer Dec 2021 – Jun 2022
 - **Mobile Development:** Agile development in Flutter for Web and Mobile applications.
- **Zyndicate** São Paulo, Brazil
Full Stack Engineer Dec 2020 – Dec 2021
 - **Web Development:** Web development using GitHub Flow, ReactJS, NextJS, GraphQL, UI/UX, CI/CD, agile methodologies and English communication.
- **Nooio** São Paulo, Brazil
Backend Developer Dec 2020 – May 2021
 - **Automation, Scraping & APIs:** Development of RESTful APIs with Node/Express and Python scripts for automation and web scraping. Test-Driven Development (TDD) and deployment on AWS.

Courses

- **Go Programming Language – Aprenda Go (Ellen Körbes):** Data structures, interfaces and polymorphism, concurrency and parallelism, error handling, testing and benchmarks. 2020 – 22h.
- **Python 3 Course – Curso em Vídeo (Gustavo Guanabara):** Solid language fundamentals, from variables to error handling. 2020 – 120h.
- **Backend Developer Course – Digital Innovation One:** Systems Architecture, Java, Spring Boot, testing, SQL, Node.js with Express, API best practices and LGPD. 2020 – 100h.

Certifications

- **Docker: Creating and Managing Containers:** Fundamentals of containers, images, volumes and orchestration with Docker.
- **Backend Developer Bootcamp – Carrefour:** Intensive backend development program focused on Java, Spring Boot and industry best practices.
- **Back-end Development with Node.js:** Building APIs and services with Node.js and Express.
- **Advanced JavaScript ES6 Development:** Modern JavaScript features (ES6+), patterns and best practices.
- **Expert Lesson: Introduction to LGPD:** Principles of the Brazilian General Data Protection Law (LGPD) and impacts on software development.

Honors & Awards

- **OBI Finalist (Brazilian Informatics Olympiad):** Qualified for the final stage of the national algorithms and programming competition.
- **Top Student of the Systems Development Program:** Recognized as the top student of the technical Systems Development class – ETEC Basílides de Godoy.

Skills

- **Programming Languages:** C# / .NET, Java, TypeScript, JavaScript (ES6+), Python, Go, Node.js, Dart, Arduino
- **Data, AI & Scraping:** SQL Server (modeling, queries and optimization), Grafana, Pandas, BeautifulSoup, Scrapy, LLMs / Applied AI, Data Visualization, Firebase, Supabase
- **Web & APIs:** Secure and scalable RESTful APIs, Angular, React, Next.js, GraphQL, Express, Laravel, Flutter, UI/UX, Digital Accessibility
- **Infra & Cloud:** AWS, Docker, CI/CD, Microservices, Messaging (RabbitMQ), Git/GitHub, Systems Architecture
- **Practices:** Clean Code, SOLID, TDD, Unit and integration testing, Automation, Agile Methodologies (Scrum/Kanban), LGPD
- **Languages:** Portuguese (native), English (advanced)
